## Ex. 5 - Deliberative

The "pole" unit has the data dictionary for sampling already set up. However, all we need are coordinates, so I can use both of them.  
Thanks.

Okay, Debbie wasn't sure if START was more comfortable using one vs. the other since it seems only one of the units gets requested I guess, but I would prefer that the one being returned in serviced. So I will bring the other unit on Sunday.

Thanks,  
Melissa

It doesn't matter really, if one needs service then I guess the other one should be brought here. Up to you, thanks.

Okay, do you have a preference to which Trimble unit? Matt is returning the one from the START office today, or could I bring the one that is currently in the office here so that Mike Davis can service the unit that has been at the START office for a while?

Thanks,  
Melissa

They are only from the iPhone.  
I would appreciate having the Trimble to gather some data for mapping, thanks.

Ex. 6 - Personal Privacy

Do you know if Ex. 6 - Personal Privacy were able to GPS the sampling locations that were taken? They thought there might be too much error in the iphone GPS readings.

Dennis, If you agree I can bring the Trimble down to get more accurate GPS. Since, I thought we should have the coordinates before any more excavation occurs for the sumps that were sampled atleast, the groundwater wells won't change so we can get those at any point.

Thanks,  
Melissa
